PROFESSIONAL SUMMARY

Senior Software Engineering & Technical Leadership professional with 13 years of experience delivering scalable Node.js applications and AWS cloud solutions for global clients, including UKRI, SSENSE and Verizon NTT.

- **Backend & Cloud Engineering:** Expertise in Node.js, JavaScript, TypeScript, AWS serverless architecture, microservices, API development and Domain-Driven Design (DDD).
- **Full-Stack Architecture & Development:** Hands-on experience with React.js, NestJS, GraphQL, PostgreSQL and MongoDB, building scalable applications and optimising backend performance.
- **Technical Leadership & Delivery Excellence:** Experienced in leading development teams, standardising engineering practices and mentoring developers. Reduced AWS costs by up to 50% while maintaining 100% client satisfaction through timely, quality-driven delivery.

TECHNICAL SKILLS

- **Backend Engineering:** Node.js | JavaScript | TypeScript | NestJS | RESTful APIs | GraphQL
- **Frontend Development:** React.js | Next.js | Angular
- **AWS Services:** Lambda | S3 | Step Functions | CloudFormation | CloudTrail | EC2 | CloudWatch | IAM
- **Cloud & Serverless:** AWS | Serverless Architecture
- **Software Architecture:** Microservices | Domain-Driven Design (DDD) | API Integration | System Design | Scalable Application Design
- **Databases & Performance:** PostgreSQL | MongoDB | SQL Server | Database Design | Query Optimisation | Performance Tuning
- **DevOps & Quality:** CI/CD Pipelines | Docker | Datadog | Code Reviews | Coding Standards
- **Technical Leadership:** Technical Mentoring | Engineering Best Practices | Agile/Scrum | Sprint Planning | Cross-Functional Delivery
- **Emerging Technologies:** AI-Assisted Development

KEY ACHIEVEMENTS

- ✓ **50% AWS Cost Reduction**: Optimised cloud resource utilisation and AWS services at SmartData Enterprises and Praesidium IT Solutions, reducing infrastructure costs while supporting application scalability and reliability.
- ✓ **100% Client Satisfaction:** Sustained client satisfaction across 13 years of software engineering experience through timely project delivery, technical quality and effective stakeholder collaboration.
- ✓ **UKRI Funding Service | 2026**: Led an India-based engineering team at FornaxTech on a project for Kerv Digital, delivering modules for UK Research & Innovation (UKRI)'s research and innovation grant & payment management system and coordinating development with UK stakeholders.
- ✓ **SSENSE Marketplace | 2021–2024:** Developed brand integrations and SKU management capabilities for a global luxury fashion marketplace, supporting inventory workflows and sales reporting through AWS serverless architecture.
- ✓ **Telecom Regulatory Compliance | 2024–2025:** Managed FCC-compliance-critical data requirements for Verizon NTT telecom infrastructure projects, supporting adherence to applicable US regulatory standards.
- ✓ **Engineering Standards & Delivery Excellence**: Established Node.js backend standards and advanced CI/CD practices at Radiant Digital, strengthening code consistency, development workflows and release reliability.

PROFESSIONAL EXPERIENCE

Senior Technical Lead | FornaxTech (Remote) *Dec 2025 – Aug 2026*

Client: Kerv Digital, London, UK | Project: UKRI Funding Service (TFS)

- Directed technical design, sprint planning & code reviews across Node.js, TypeScript, React.js, Next.js, PostgreSQL, and AWS, ensuring alignment with project requirements and engineering standards.
- Led an India-based engineering team to deliver UKRI Funding Service modules for Kerv Digital, coordinating development with UK stakeholders.
- Applied AI-assisted development approaches to support software implementation and code refinement, while maintaining code quality and alignment with engineering standards.
- Delivered assigned project modules within agreed timelines, maintaining high standards of code quality and implementation reliability.
- Mentored engineers on coding practices, solution design and debugging, strengthening technical capability and maintainability.

System Analyst | Radiant Digital, Hyderabad (Remote) *Mar. 2024 – Aug. 2025*

Client: Verizon | Verizon NTT FCC Compliance

- Designed and developed secure, scalable backend systems using Node.js, NestJS and PostgreSQL, alongside React.js-based full-stack applications.
- Led India-based development teams in collaboration with US counterparts, coordinating technical execution, mentoring and client engagement.
- Served as Node.js Chapter Lead, standardising backend engineering practices, coding standards and reusable development frameworks across teams.

- Drove CI/CD adoption and Agile delivery practices, strengthening release reliability, code quality and development consistency.
- Evaluated emerging technologies and legacy frameworks, identifying modernisation opportunities and translating business requirements into scalable technical solutions.
- Initiated AI-assisted development initiatives by building proofs of concept, conducting demonstrations and deploying tools to automate workflows and support insight generation.
- Managed FCC-compliance-critical telecom infrastructure data, supporting adherence to applicable US regulatory requirements.
- Strengthened engineering capabilities through technical workshops, developer upskilling, knowledge-sharing sessions and framework evaluations.
- Collaborated with product, design and QA teams to resolve technical challenges, manage project risks and align delivery with business priorities.

Senior Software Engineer | Clarion Technologies, Pune (Remote) *Mar. 2021 – Mar. 2024*

Client: SSENSE | SSENSE Marketplace System

- Developed scalable full-stack applications using Node.js and TypeScript for international clients.
- Designed and deployed AWS serverless architectures, optimising application scalability, performance and infrastructure costs.
- Implemented Datadog monitoring to identify performance bottlenecks and support proactive issue resolution.
- Integrated APIs for luxury fashion brands, including Gucci, to streamline SKU management and inventory workflows.
- Developed sales reporting tools to improve visibility into brand performance and business insights.
- Collaborated with cross-functional teams to translate business requirements into technical solutions, ensuring timely delivery and 100% client satisfaction.

Senior Associate Delivery | SmartData Enterprises Inc, Mohali *Jan. 2019 – Mar. 2021*

- Developed web applications using Node.js, Angular and JavaScript, translating business requirements into maintainable software solutions.
- Managed AWS EC2 and S3 resources, supporting infrastructure performance, scalability and cost optimisation.
- Coordinated project delivery through Jira, sprint planning and stakeholder communication to maintain delivery schedules.
- Mentored developers and facilitated code consistency through collaboration, knowledge-sharing and technical reviews.

Senior Software Engineer | Praesidium IT Solutions, Mohali *Oct. 2017 – Jan. 2019*

- Developed full-stack applications using Node.js and Angular, implementing modular components to improve maintainability and development efficiency.
- Managed AWS EC2, S3 and IAM resources, supporting infrastructure reliability and achieving reported uptime of 99.9%.
- Designed RESTful APIs and optimised MongoDB schemas and indexes to improve data retrieval and backend responsiveness.
- Conducted code reviews and mentored developers, strengthening coding standards and collaboration across the engineering team.

Software Engineer | Acmeminds Pvt Ltd, Chandigarh *Aug. 2013 – Oct. 2017*

- Developed web application modules using Node.js, Angular, ASP.NET and SQL Server across diverse project requirements.
- Integrated Google Maps APIs and geolocation features into MiRide.com to support location-based functionality and ride tracking.
- Implemented real-time ride-tracking capabilities to improve visibility into ride activity and operational responsiveness.
- Migrated legacy components towards modern full-stack frameworks, improving application modularity and maintainability

EDUCATION

Post Graduate Diploma in Information Technology Project Management | NMIMS 2021
Bachelor of Technology in Computer Science | Uttar Pradesh Technical University 2013

KEY PROJECTS

UKRI Funding Service (TFS) – Award Management Module | Client: Kerv Digital, UK | Employer: FornaxTech Dec 2025 – Aug 2026

- Led an India-based development team in delivering the Award Management module for a UK government research-funding platform, supporting grant creation and payment-processing workflows.
- Developed features using Next.js, React.js, TypeScript, PostgreSQL, AWS and Docker, applying Domain-Driven Design (DDD) and Hexagonal Architecture to deliver maintainable solutions on schedule.

Verizon NTT – Telecom Infrastructure & FCC Compliance | Client: Verizon NTT | Employer: Radiant Digital Mar 2024 – Aug 2025

- Developed solutions for managing sensitive telecom infrastructure data, supporting secure processing within the US government's server environment and applicable FCC-related requirements.
- Coordinated client requirements and software development to support near-real-time incident reporting and timely communication of major technical issues to US government stakeholders.

SSENSE Marketplace – Brand Integration & SKU Management | Client: SSENSE | Employer: Clarion Technologies Mar 2021 – Mar 2024

- Developed API integrations for luxury fashion brands, including Gucci, enabling SKU management and product data exchange across the SSENSE marketplace.
- Built sales and performance reporting capabilities and collaborated directly with SSENSE stakeholders to deliver integration solutions aligned with business requirements.

Certifications: Professional Certificate Course in Generative AI and Machine Learning (Certified)
